

Atharv Ganpati Mane.

Passionate and detail-oriented **Software Developer** with hands-on experience in frontend and backend development through academic and personal projects. Skilled in technologies like, HTML, CSS, JavaScript, Express, Node and MySQL. Strong problem-solving abilities with a keen interest in building modern web applications and learning new technologies

Email:

atharvmane404@gmail.com

Contact No:

(Mobile) +91-9702161668

Current Address:

Flat 004, Bldg 3, B wing, B type
Mahalaxmicity, Vihigar, New Panvel,
NAVI MUMBAI
MAHARASHTRA 410206

Domain:

Full Stack Web Development,
Artificial Intelligence & Machine Learning,
Database Management

Personal Data:

DOB: 15-06-2005

Sex: Male

Marital Status: Single

Nationality: Indian

Languages Known:

English, Hindi, Marathi

Hobbies:

Bikes, Cooking, Traveling

Career Summary

- **CSE (AI/ML) student with knowledge of backend development, APIs, databases, and AI/ML technologies. Interested in building efficient software solutions and continuously learning modern technologies.**

- Knowledge of frontend and backend web development using **HTML, CSS, JavaScript, Java, MySQL**, and basic **MongoDB**.
- Good understanding of **Software Development Life Cycle (SDLC)** and project development workflows.
- Experience in developing academic and personal projects using modern technologies.
- Familiar with **database management, REST APIs**, and basic **authentication concepts**.
- Interested in **application logic, system efficiency**, and **performance optimization**.
- Creative thinker with the ability to develop **innovative project ideas** and **practical solutions**.
- Currently learning **Core Backend Development, Machine Learning**, and **Artificial Intelligence concepts**.
- Basic hands-on experience in **AI model training, fine-tuning**, and **LLaMA Factory workflows**.
- Interested in **Generative AI, intelligent systems**, and **AI-driven automation concepts**.
- Good **theoretical knowledge** of **Software Testing, DBMS**, and **Operating Systems**.
- Familiar with **modern development tools, version control systems**, and **collaborative workflows**.
- Strong **problem-solving abilities** with continuous learning and **adaptability to new technologies**.

Education Qualifications

- **Pursuing Bachelor's Degree in Computer Science Engineering (Artificial Intelligence & Machine Learning) from Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology (ViMEET).**
- **Final Year CSE (AI/ML) Student | Expected Graduation Year: 2027.**

Areas of Expertise

Operating Systems - Windows 10/ Windows 11

Programing Language – HTML, CSS, JS, PYTHON.

Database – MYSQL.

Tools – Vs Code, GitHub, Postman, Figma, Hugging Face, Ai Tools

Projects & Practical Experience

- **Fresher with hands-on experience in academic and personal development projects.**

PROJECT SUMMARY

Role	System Designer / Backend & AI Developer
Project Title	AI Interview Simulator
Contribution	Orange Ethernet Management System
Team Size	2
Tools/Technologies	React.js, Express.js, MySQL, Gemini AI API
Project Description	AI-powered interview preparation platform designed for students and professionals to practice mock interviews, coding assessments, and DSA challenges based on target companies. The system uses AI for interview simulation, real-time feedback, coding evaluation, and camera-based activity tracking.
Features	• AI-generated mock interview system • Company-based coding and DSA practice • Real-time interview feedback generation • AI-powered interview simulation • Coding assessment and evaluation • Camera tracking and monitoring feature • Technical and HR interview preparation • Interactive interview practice platform

Role	Team Lead / AI & Backend Developer
Project Title	DODO AI – Personal AI Assistant
Contribution	Created the original project idea, designed the UI concept, workflow, system architecture, and application logic, contributed to backend development and AI integration, and worked on Llama/Mistral 7B model fine-tuning for advanced assistant capabilities.
Team Size	4
Tools/Technologies	HTML, CSS, JavaScript, Express.js, MySQL, Gemini AI API, Llama/Mistral 7B Fine-Tuning (<i>Prototype</i>)
Project Description	AI-powered personal assistant designed to manage daily tasks, schedules, events, personal goals, reminders, and finance-related activities through intelligent automation and summarization. The system focuses on organizing and handling user activities across multiple devices using AI-driven assistance.
Features	• AI-based personal assistant system • Daily task and schedule management • Smart event and reminder handling • Personal goal tracking system • Finance and expense management support • AI-generated summaries and assistance • Cross-device accessibility • AI model integration and fine-tuning • Intelligent workflow automation
